

```

    state: "designate",
    convergent: false
}

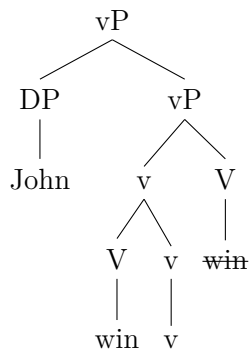

```

ASSEMBLED TREES

```

{
  tag: "v_intrans",
  syn: [
    "cV[win]",
    "cv[intrans]",
    "=D[john]]",
  sem: "",
  phon: "",
  constituents: ["win", "John"]
}

```

- (14) As before, there is no other item in the `lexical` array, so the stage simply completes without further ado (after, of course, failing to `probe`).

DERIVATION

```

{
  lexical_array: [

```
