

- (18) Finding itself in an “incomplete” state again, the **derivation** pulls out the next item from its **lexical array** and makes a new **astage**

DERIVATION

```

{
  lexical_array: [
    [{"promise"}, {"v_ditrans"}],
    [{"T-past"}, {"C"}]],
  history: [
    <stage_1>,
    ...,
    <stage_15>],
  active_stages: [<stage_15>, <stage_14>],
  state: "active",
  convergent: false
}

```

STAGE_15

```

{

```
